INTRODUCTION

Dear Coach,

This session guide has been created with the intent to provide direction and guidance to the volunteer coaches of our programs, so that they can spend their time and energy on the field, rather than scouring the web for session ideas.

These 25 sessions are what we feel best represent the philosophy and playing style of the programs 24-7 work with. With sessions hand picked by our professional coaches, this manual gives a range of practice ideas for all stages of development from U9 - U19.

The practices in this guide contain a balance of the technical, tactical, physical and psychosocial aspects that will allow the players to push themselves to reach their goals in the game, whilst having fun in activities that are specifically designed to be enjoyable and adaptable to all levels.

The contents on page three, lists the recommended age groups that the sessions are aimed towards. The manual contains sessions from U9 - U19 giving a long term development plan to help players and teams, in order to help reach their potential. On Page four, you will also find a recommended syllabus to help you plan your entire season and allow for some familiarity with the activities the players are seeing each season.

The key below right should help identify each of the symbols within the session plan. For any activities or terminology that you do not understand, refer to the 24-7 online curriculum or contact your Director of Coaching and Player Development (DOC).

This guide is just a sample of the sessions available to our volunteer coaches, with many more available in 24-7 UK Soccer Academy's Online Curriculum. Login details will be provided by your DOC.

We are pleased to be able to provide this resource to our coaches and players and hope that it allows you to spend more of your energy on the field, to allow for maximum enjoyment and player development.
